Your Local Pest and Rodent Expert

Cloths Moth Treatment

CLIENT PREPARATION FORM

In order for our company to provide the most effective service possible, we ask that before our arrival you review and complete all the necessary preparations listed below. The following steps will ensure that your Technician is able to provide an effective and safe treatment.

How To Prepare For The Service

LIVING ROOM, BEDROOMS, CLOSET, ETC

Vacuum all rugs, carpet, and upholstered furniture. Vacuum bag should be discarded immediately upon completion.

Any unlaundered wool, or natural fibre clothing should be laundered or at least placed in a hot dryer for one hour. (Follow all label recommendations before laundering)

Move all furniture 12" (30 cm) away from the walls (Please be sure to exercise safety first and do not attempt to move very large furniture)

Empty all closets that are experiencing the pest issue or signs of activity

After The Treatment

The treatment will remain effective only if the following steps are taken after your home is serviced:

- ▶ Avoid waxing or washing floor surfaces, especially the edges for at least 3 weeks after treatment, and do not

steam clean carpets. Vacuum as usual.

- ▶ DO NOT use other pest control chemicals (powders or sprays) or cleaning products anywhere near spray treatments, as this will decrease effectiveness.

Reminder

- ▶ When a spray is applied inside your residence, you and your pets may be required to vacate the premises. Typically, a 2-hour window is sufficient. However, your representative will advise you at the time of service or leave an information notice at your premises if additional time is required.
- ▶ Persons with underlying health conditions should consult their family physician if they are concerned about re-entry time.
- ▶ Fish aquariums may be left on-site. However, they should be covered, and air filters disconnected.
- ▶ Please be patient. The treatment will reduce activity to very low levels within approximately 2-4 weeks, leading to elimination.

What You Can Expect From The Treatment

Your Technician will use a variety of methods to control the pest depending on each unique situation. The majority of the treatment will focus on the room's base-

boards and closet shelving units in areas where the infestation was detected. All treatments will be made with your safety in mind to ensure your health.
